

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2018-0073]

Notice of Availability of a Pest Risk Analysis for the Importation of Fresh Guava Fruit from Taiwan into the Continental United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability.

SUMMARY: We are advising the public that we have prepared a pest risk analysis that evaluates the risks associated with importation of fresh guava fruit from Taiwan into the continental United States. Based on the analysis, we have determined that the application of one or more phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh guava fruit from Taiwan. We are making the pest risk analysis available to the public for review and comment.

DATES: We will consider all comments that we receive on or before [Insert date 60 days after date of publication in the Federal Register].

ADDRESSES: You may submit comments by either of the following methods:

- Federal eRulemaking Portal: Go to
 http://www.regulations.gov/#!docketDetail;D=APHIS-2018-0073.
- Postal Mail/Commercial Delivery: Send your comment to Docket No. APHIS-2018-0073, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at http://www.regulations.gov/#!docketDetail;D=APHIS-2018-0073 or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: Mr. Tony Román, Senior Regulatory Policy Specialist, Regulatory Coordination and Compliance, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737-1231; (301) 851-2242.

SUPPLEMENTARY INFORMATION: Under the regulations in "Subpart–Fruits and Vegetables" (7 CFR 319.56-1 through 319.56-12, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into or disseminated within the United States.

Section 319.56-4 contains a performance-based process for approving the importation of certain fruits and vegetables that, based on the findings of a pest risk analysis, can be safely imported subject to one or more of the five designated phytosanitary measures listed in paragraph (b) of that section.

APHIS received a request from the national plant protection organization (NPPO) of Taiwan to allow the importation of fresh guava fruit (*Psidium guajava*) into the continental United States. As part of our evaluation of Taiwan's request, we have prepared a pest risk assessment (PRA) to identify pests of quarantine significance that could follow the pathway of importation of fresh guava fruit into the continental United States from Taiwan. Based on the

PRA, a risk management document (RMD) was prepared to identify phytosanitary measures that could be applied to the fresh guava fruit to mitigate the pest risk.

We have concluded that fresh guava fruit can be safely imported from Taiwan into the continental United States using one or more of the five designated phytosanitary measures listed in § 319.56-4(b). The NPPO of Taiwan would have to enter into an operational workplan with APHIS that spells out the daily procedures the NPPO will take to implement the measures identified in the RMD. These measures are summarized below:

- Importation in commercial shipments only,
- Registration of places of production and packinghouses with the NPPO of Taiwan,
- Regular inspections of places of production by the NPPO,
- Grove sanitation and trapping for fruit flies in places of production,
- Safeguarding and identification of the lot throughout the growing, packing and export process,
- Phytosanitary treatment (cold treatment or irradiation),
- Pre-export inspection by the NPPO and issuance of a phytosanitary certificate with an additional declaration, and
- Port of entry inspections.

Each of the pest risk mitigation measures that would be required, along with evidence of their efficacy in removing pests of concern from the pathway, are described in detail in the RMD.

Therefore, in accordance with § 319.56-4(c)(3), we are announcing the availability of our PRA and RMD for public review and comment. Those documents, as well as a description of the economic considerations associated with the importation of fresh guava fruit from Taiwan

and a treatment evaluation document that supports the addition of new cold treatment schedules

for Bactrocera spp. fruit flies in guava from Taiwan, may be viewed on the Regulations.gov

website or in our reading room (see ADDRESSES above for a link to Regulations.gov and

information on the location and hours of the reading room). You may request paper copies of

these documents by calling or writing to the person listed under FOR FURTHER

INFORMATION CONTACT. Please refer to the subject of the analysis you wish to review

when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding the

import status of fresh guava fruit from Taiwan in a subsequent notice. If the overall conclusions

of our analysis and the Administrator's determination of risk remain unchanged following our

consideration of the comments, then we will authorize the importation of fresh guava fruit from

Taiwan into the continental United States subject to the requirements specified in the RMD.

Authority: 7 U.S.C. 1633, 7701-7772, and 7781-7786; 21 U.S.C. 136 and 136a; 7 CFR

2.22, 2.80, and 371.3.

Done in Washington, DC, this 10th day of December 2018.

Kevin Shea

Administrator, Animal and Plant Health Inspection Service.
